COURSE CODE: USBP08A

CREDIT: 1 LU / HSW HOUR

COURSE DESCRIPTION:

- As the number and volatility of threats to facility security and safety continue to escalate, protection is becoming paramount in the scope of today's facility design. Whether it's high-level protection from ballistics, blast, storm impact or forced entry, this course reviews the various protection levels, testing standards, best practices and the fundamental fenestration solutions which will fortify your building to protect people and property.

PURPOSE:

- Identify key fenestration design criteria which will fortify buildings from ballistic, blast, forced entry and environmental threats.

OBJECTIVES:

- Identify security threats which dictate design standards and product performance criteria.
- Compare and contrast design options to fortify buildings with security, safety and aesthetics in mind.
- Define the different levels of ballistic, blast and forced entry testing standards.
- Properly specify ballistic, blast, forced entry and storm impact fenestration solutions.
